CUKUROVA GENERATOR SYSTEMS

1500 Rpm, 50Hz, 400V

Volvo TAD1341GE diesel engine

Sincro SK315SS alternator

Standard Generator Features

- AMF, Automatic mains failure unit
- Heavy duty type, 6 cylinder, water cooled engine
- ♦ 55°C tropical type radiator
- Starter motor
- ♦ Lead acid battery
- Charging alternator
- Battery charge redressor
- Heavy duty, brushless type alternator
- Base frame with anti-vibration units
- Industrial type silencers
- ♦ Flexible exhaust compensator
- Block water heater unit
- Control panel with digital-automatic main control module
- Fan, fan drive, charging alternator drive and all rotating parts covered
- Radiator matrix covered by metal mesh against the mechanical damages
- ♦ Fabricated and welded steel base frame
- Anti-vibration mountings
- Engine and alternator manufacturer test reports
- ♦ Factory load, performance and function tests

Optional Features

- Automatic load transfer panel
- Automatic syncronization and power sharing systems
- Soundproof canopy
- Container type enclosers
- ♦ Road trailer
- Job-site trailer
- ♦ Protection circuit breaker
- ♦ Air start
- ♦ Remote type radiator
- ♦ Base fuel tank
- ♦ External type fuel tank
- Automatic fuel transfer system
- Residential silencer

APPLICATION DATA

Volvo TAD1341GE Engine

	Features

The TAD1341GE is a powerful, reliable and economical Generating Set Engine Diesel built on the dependable Volvo in-line six design.

Durability & low noise

Designed for easy, fast and most economical installation. Field tested to ensure highest standard of durability and long life. Well-balanced to produce smooth and vibration-free op er a tion with low noise level. To maintain a controlled working temperature in cylinders and combustion

cham bers, the engine is equipped with piston cooling.

Low exhaust emission

The state of the art, high-tech injection and highly efficient charge air system with low internal loss es contributes to excellent combustion and low fuel consumption.

The TAD1341GE is EU Stage 2 emission certified.

Easy service & maintenance

Easily accessible service and maintenance points contribute to the ease of service of the engine.

Engine and Block

- Cast iron cylinder block with optimum distribution of forces without the block being unnessarily heavy.
- ♦Wet, replaceable cylinder liners
- ♦Piston cooling for low piston temperature and reduced ring temperature
- ♦Tapered connecting rods for increased piston lifetime
- ◆Crankshaft induction hardened bearing surfaces and fillets with seven bearings for moderate load on main and high-end bearings
- Case hardened and nitrocarburized transmission gears for heavy duty operation
- ♦Keystone top compression rings for long service life
- Viscous type crankshaft vibration dampers to withstand single bearing alternator torsional vibrations
- ♦Replaceable valve guides and valve seats
- Over head camshaft and four valves per cylinder

Model	Standby kW		Prime kW

TAD1341GE	308	302	281	275

Cooling System

Type Tropical, heavy duty type

Ambient temperature, °C 55 Engine+Radiator coolant cap., Liters 44

 Efficient cooling with accurate coolant control through a water distribution duct in the cylinder block. Reliable sleeve thermostat with minimum pressure drop

- ♦Belt driven coolant pump with high degree of effi ciency
- Electronically controlled viscous fan drive provides lower noise and fuel consumption (optional).
- ◆Coolant filter as standard

Fuel System

Type of injection system

Fuel injecter

Governor type

Direct injection

Electronic unit injector

Volvo / EMS 2.2

- Electronic high pressure unit injectors
- ♦Fuel prefilter with water separator and water-in-fuel indicator / alarm
- ♦Gear driven low-pressure fuel pump
- Fine fuel filter with manual feed pump and fuel pressure switch
- **\$**

Fuel Consumption	1		
grams per kWh	%100 Load	191 g/kWh

Technical Specifications

Manufacturer VOLVO
Model TAD1341GE

Type 4 cycle, water-cooled, diesel engine

Number of cylinders 6

Cylinder arrangement Vertical in-line
Displacement, Liters 12,78
Bore X Stroke, mm 131 X 158
Compression Ratio 18.1:1
Combustion System Direct injection

Aspiration Turbocharged, air-to-air charge cooled Rotation Anti-clockwise viewed towards flywheel

Gross engine power, kWb 308
Fan Power, kWm 6
Exhaust gas temp.(after turbo), °C 414
Exhaust gas flow (after turbo),m³ / min 52
Mean piston speed, m / s 7.9

Lubricating System

Type Pressurized
Capacity, Liters 36
Lub oil pressure , kPa 370 - 520

◆Full flow oil cooler

◆Full flow disposable spin-on oil filter, for extra high filtration
 ◆The lubricating oil level can be measured during operation
 ◆Gear type lubricating oil pump, gear driven by the transmission

Electrical System

Alternator Bosch 80 A
Starter motor (DC) Melco, 24 Volt

Starter motor power 7 kW

 EngineManagementSystem(EMS2), an electronically controlled processing system which optimizes engine performance. It also includes advanced facilities for diagnostics and fault tracing

Possibility to perform a start battery test according to the NCPA requirements via CAN bus signals.

Sensors for oil pressure, oil temp, boost pressure, boost temp, coolant temp, fuel temp, water in fuel, fuel pressure and two speed sensors.

Sincro SK315SS Alternator

Standard Features

Electrical performance

Class H insulation

Windings are vacumed under pressurized polyester resin and varnished

Standard 12-wire re-connectable winding, 2/3 pitch

High efficiency and motor starting capacity

Model	Standby		Prime	
Model	kVA	kW	kVA	kW
SK315SS	385	308	350	280

Protection degree

Sincro alternators are standard IP20

All the rotating and electrically energized parts are fully guarded.

Higher protection degree can be supplied on request

Costruction

Single bearing design

Bearings are dimensioned for heavy duty

Steel frame

Cast iron flanges and shields

Automatic Voltage Regulator

DBL1 automatic voltage regulator provides 0,25 % regulation and underspeed

protection

Transient features

Transient voltage drop for rated step load at 0.8 power factor is less than 18%

Single phase operation

All brushless alternators can be connected for single pase use

Standards

Sincro alternators conforms to the main international standards and regulations:

IEC 34.1, IEC 34.5, IEC 34.22, EN55011, EN50081-1, EN50082-2

Optional Equipment

- ♦N° 3 Thermal contacts N.C. (N.O. On request)
- ♦Protection IP23
- ♦Protection IP44 (90 % of output power)
- ♦N° 1 PT100 on the beraing
- ◆Tropicialized winding
- ◆Device for parallel operation with other alternators
- ♦Space heaters 230V
- ♦N° 3 Thermistor PTC
- ♦N° 3 Thermoresistors PT100
- ♦N° 1 Potentiometer for voltage remote control
- ♦Special voltages

control panel **CJ350VS**

♦ComAp InteliLiteNT AMF25 digital automatic control module ♦Emergency stop button

€omAp InteliLiteNT AMF25 Control Module

Description

♦The model AMF25 is an Automatic Mains Failure Control module.

♦The modul is used to monitor a mains supply and automaticlly start a standby generator set

♦The module also provides indication of operational status and fault conditions automaticly shutting down the genset and indicating failures by means of

• an LCD display, and appropriate flashing LED on the front panel.

Selected timers and alarms can be altered by the user from the front panel.

Alterations to the system are made using USB and a PC. This

interface also provides real time diagnostic facilities

Specifications

♦180mm x 120mm dimensions

♦Graphic 128 x 64 pixel display

♦Developed 16-bit Microprocessor design

♦Easy comprehended display

◆LED mimic diagram

SMS messaging capability with suitable GSM Modem

◆PC software is MS Windows based and allows the operator to control the

module from a remote location (with USB)

◆Easy pushbutton controls

♦System parameters can be adjusted manually from the front panel

♦kVA.kW ve Cosφ measurements

♦Communication with MODEM / Ethernet

♦Modbus RTU

♦User selectable RS232 or RS485 communications

3 analog inputs, 7 digital inputs, 7 digital outputs

Power Ratings

Standby power rating is for the supply of emergency power at variable load for the duration of the non-avalaibality of the mains power supply. No overload capacity is available at this rating. A standby rated engine should be sized for an avarage load factor of 80% based on published standby rating for 500 operating hours per year. Standby ratings should never be applied except in true emergency power failure conditions.

Prime power rating is available for unlimited hours per year with a variable load of which the average engine load factor is 80% of the published power rating, incorporation of a 10% overload for 1 hour in every 12 hours of operation which permitted

Continuous power rating is available for continuous full load operation.No overload is permitted.

Acc. to ISO 3046/1, BS 5514, DIN6271
